

Acuity Brands Juno® Smart Home Solutions

SPECIAL RECOGNITION FOR
VALUE PROPOSITION

Juno® Smart Home Solutions are the perfect way to get connected with your smart home lighting solution.

The Smart Wafer Downlight Series uses Bluetooth or Zigbee to pair to your mobile device or compatible smart home hubs and is certified with SmartThings, Alexa and Google Home platforms once installed. When paired with a compatible smart home hub you can enable voice control, time schedules, and groups to control the lighting throughout your home.

Once installed, it's easy to customize your lighting with tunable white color control (2700K-5000K), dimming down to 1% to set the perfect mood, and on/off control. The Juno® RetroBasics™ Smart LED Retrofit Downlights also offer a full spectrum of RGBW color options.
