

ClimateMaster Trilogy QE Geothermal Heat Pump with iGate2 Intelligent Communicating Controls

The Trilogy QE with iGate2[®] is a fully variable system that exceeds 45 EER while providing all the heating, cooling, and domestic hot water needs of a typical residence, while also providing today's homeowners more transparency into their system's daily operations and energy consumption data.

ClimateMaster's iGate2 Smart Thermostat provides intelligent recommendations based on user behavior for maintaining the system at top performance, while the mobile app myUplink[®] allows remote access into Trilogy system for control and monitoring and provides service professionals the real-time diagnostic tools they need to better serve their clients. Please visit ClimateMaster to learn more.

Product Specifications

- **AHRI Certified Reference #205767615**
- **EER cooling mode** up to 45.1
- **COP heating mode** up to 8.7
- **COP water heating mode** up to 5.0
- **Capacity QE 0930** = 9,000 – 30,000 BTUH
- **Capacity QE 1860** = 18,000 – 60,000 BTUH
- **CEE Tier 2** and **CEE Energy Management Criteria**
- **ENERGY STAR®** Most Efficient
- **Connectivity Protocols:** Wi-Fi
- **Platform Compatibility:** Amazon Alexa and Google Home
- **Warranty:** 10 Year limited parts and labor allowance
- **Energy Management Features:** Vacation or away mode
