

VRV LIFE with Daikin One+ Smart Thermostat

Re-inventing residential air-conditioning by breaking technological barriers, Daikin VRV LIFE systems bring inverter driven VRV technology providing the ultimate residential system for application and flexibility.

Precision engineered for zoning, low sound and space saving, with the ability to mix and match ducted and ductless indoor units in combination with a gas furnace.

The Daikin One+ Smart Thermostat is designed exclusively for Daikin equipment.

The thermostat is also supported by an app that allows a homeowner to control their Daikin system from anywhere, or via several wi-fi voice assistance controllers. Seven-day scheduling, "away" mode, and geo-fencing promote energy efficiency.

Product Specifications

- **AHRI Certified Reference #205724754**
- **SEER:** 18
- **EER:** 12
- **HSPF:** 10.3
- **Capacity Ratio 17°F/47°F:** 64%
- **Capacity:** 34,200 BTU/h
- **Refrigerant:** R410a
- **CEE Tier 1 and CEE Energy Management Criteria**
- **Connectivity Protocols:** Wi-Fi
- **Platform Compatibility:** Amazon Alexa, Google Home, Open API (Crestron, Control4)
- **Warranty:** 12 year limited replacement warranty with registration
- **Energy Management Features:** Geofencing, outdoor temperature sensing, vacation or away mode
- **Load Management Features:** Demand response via external control adaptor (DTA104 board)
