

## Mitsubishi Electric Trane HVAC US (METUS) Deluxe Wall-mounted System with H2i plus® and kumo touch™

The Deluxe Wall-mounted System with Hyper-Heating INVERTER® (H2i plus®) technology uses an enhanced compressor system to deliver an unparalleled 100% of rated heating capacity at outdoor temperatures as low as -5° F and continued operation down to -13° F without supplemental heat.

Mitsubishi Electric variable-capacity heat pumps help homes in all climates maximize potential for energy efficiency, decarbonization and comfort without fossil fuels. Equipped with INVERTER-driven compressors, this innovative technology uses minimal energy to reach and maintain homeowner set points, making the systems up to 40% more efficient than conventional heaters and air conditioners.

## Product Specifications

- **AHRI Certified Reference** #205975731
- **SEER:** 33.1
- **EER:** 19.05
- **HSPF:** 13.5
- **Capacity Ratio 17°F/47°F:** 62%
- **Capacity:** 6,000 BTU/h cooling;  
8,700 BTU/h heating
- **Refrigerant:** R410a
- **CEE Tier 1, CEE Energy Management Criteria,  
and CEE Demand Response Criteria**
- **Connectivity Protocols:** Bluetooth Low Energy (BLE), Wi-Fi, Redlink wireless communication
- **Platform Compatibility:** Amazon Alexa, Google Home, IFTTT (partial functionality)
- **Warranty:**
  - **Parts:** Parts and compressor warranted for 10 years to original owner if registered within 90 days of installation
- **Energy Management Features:** Occupancy sensing, vacation or away mode, “eco” or low power mode
- **Load Management Features:** Demand response via USNAP interface

Available for purchase and installation now through our network of local HVAC contractors.
