

Trane Residential XV20i Heat Pump with Trane Link

SPECIAL RECOGNITION FOR
DIAGNOSTIC CAPABILITIES

It's Hard To Stop A Trane.®

Introducing the Trane XV20i Heat Pump with Trane Link: the latest innovation from Trane, which is available as part of the Variable Speed portfolio.

Trane Link increases installation accuracy and provides the ability to remotely monitor a system's performance post-install. Dealers and consumers can expect reduced callbacks and more efficient service calls years after install. Trane Link technology has a centralized system that interacts with the Trane Diagnostics mobile app, helping to ensure accuracy during the installation process of Variable Speed systems. This state-of-the-art technology certifies the installation is 100% accurate before the team finalizes the installation.

Product Specifications

- **AHRI Certified Reference #** 207690033
- **SEER:** 21
- **EER:** 13.5
- **HSPF:** 10
- **Capacity Ratio 17°F/47°F:** 25%
- **Capacity:** 35,600 BTU/h
- **Refrigerant:** R410a
- Meets **CEE Energy Management Criteria** and **CEE Demand Response Criteria**
- **ENERGY STAR®** Most Efficient
- **Connectivity Protocols:** Bluetooth Low Energy (BLE), CTA-2045-A, OpenADR 2.0, Wi-Fi, Z-Wave
- **Platform Compatibility:** Amazon Alexa, Google Home, Samsung SmartThings
- **Warranty:** If registered, 12-year compressor and 10-year coil and functional parts; non-registered: 5-year compressor, coil, and functional parts
- **Energy Management Features:** Occupancy sensing, outdoor temperature sensing, vacation or away mode, “eco” or low power mode, energy consumption reporting

The Trane Residential XV20i heat pump is now available nationwide, with the Trane Link technology available nationwide by the end of September 2022.
