

## Wi-Fi Smart Thermostat + Wi-Fi Water Heater Controller

---

The TrickleStar Wi-Fi Smart Thermostat and Electric Water Heater Controller provide integrated control, scheduling and demand response capability for two of the most energy-intensive applications in most households namely, HVAC and water heating.

The Smart Thermostat is easy to use, highly configurable and features an industry-first backlit jog-dial for intuitive control by the widest range of end-users.

The Water Heater Controller retrofits existing electric water heaters and new CTA-2045B electric water heaters with control, power measurement, flood detection, ToU scheduling and demand response capability.

TrickleStar's connected platform, provides utilities with a unified HVAC and water heater control solution that's easy to install, feature rich and simple for users to operate.
