

Lumin Smart Panel

Lumin® is the pioneer and leading provider of responsive energy management solutions.

Through its innovative *Control What Matters*™ approach, Lumin offers the only universally-compatible, retrofit-ready load management platform on the market that works with all batteries and load centers without changing your current system: the Lumin Smart Panel. By making ordinary circuits smart, Lumin grants comprehensive control over the home microgrid, enabling whole-home backup, electrification, and participation in demand response programs. Through the user-friendly Lumin app, homeowners can monitor their energy use, create on-grid and off-grid circuit management schedules, and automate time-of-use rate avoidance, providing maximum energy control. Backed by a network of installers across the U.S. and Canada, Lumin's technology is paving the way for an all-electric, clean energy future. Discover more at www.luminsmart.com.

Product Specifications

- **Energy Management**

Features: Vacation, away, or nighttime mode, “Eco” or low power mode, energy consumption reporting or energy meters, ESS state-of-charge load management, grid presence sensing, demand rate management, time-of-use rate arbitrage, efficiency scheduling, and service upgrade avoidance when installing EVs through load management.

- **Connectivity Protocols:**

Broadband Cellular Network Connection (2G, 3G, 4G, 5G, or LTE), Ethernet, and Wi-Fi.

- **Smart Home Platform**

Compatibility: Control4.

Lumin is available through the following distributors

- Greentech
- Rexel
- US Renewable Solutions
- NAZ Solar Electric
- altE
- Renvu
